Plot Profile of Zeiss Images with Image J

1.   Download files from OMAL server.

2.   Open ImageJ

3.   In ImageJ: **File ---> Open**

4.   Select folder you want in **Look In**

5.   Double click to open up image you want **.lsm file**.

6.   Move the Space Bar at the bottom to see each different color.

7.   With slider on the first color: Use the line icon [5th icon] to draw the line where you are interested in.

8.   Go to **Analyze ---> Plot Profile**

9.   Plot profile of that color through that line will appear. It can be saved.

10. Repeat for other colors.
