

FV1000 Images Opened With ImageJ

1. Download files from OMAL server.
2. Open ImageJ.
3. In ImageJ: **File ---> Open**
4. Click unzipped file folder to open it.
5. Double click to open up image folder you want.
6. Click to open up **.tif** file for that image.
7. Repeat step 6 until all **.tif** files are open
7. In menu bar: **Image ---> Color --->Merge Channels.**
8. Assign proper color to each image. If there is no image for that color channel select ***none***. Check **Create Composite.**
9. Click **OK.**
